Contents of volume 12

January 1977

The Nuffield A-level physics examination: P J BLACK and J M OGBORN *12*
Nuffield O-level examining: JOHN L LEWIS *16*
JMB physics papers 1951–1976: R M LEE *20*
Constructing objective tests: G M FORREST *24*
The new London A-level physics syllabus: R E DIMES and P HECKER *27*
Profiles in examinations: R W FAIRBROTHER *29*
Physics curriculum work at the IPN, Kiel: WALTER WESTPHAL *32*
The physics of a controversial goal: J R PRESCOTT *43*
Relativistic trajectories in homogeneous electric fields: JORN LYNGESEN *46*
Developing CAL for undergraduate science teaching: ALLAN CREASE *48*
Physics on stamps: Appendix VII: E J BURGE *52*
Physics in comprehensive schools: SHEILA SAVILLE and BRIAN WOOLNOUGH *54*
Spherical projections in teaching astronomy: D R HUTTON *58*
Leader, News and comment *1* Letters *6* Physics apparatus *11* Queries in physics *37* Notes on experiments *38* Book reviews *62* Forthcoming conferences and courses *64*

March 1977

At the research frontier: J M ZIMAN *68*
A Nuffield view of physics: JOHN L LEWIS *70*
O-level physics reborn: DENYS GASKELL *73*
The changing face of physics: H LIPSON *75*
A question of choice: MAURICE EBISON *78*
CAL in physics—other approaches: TERRY HINTON *83*
Improving a Keller plan course: E R DAVIES *87*
The early scientific instrument makers: G D BISHOP *92*
Energy for mankind: L PINCHERLE and P RICE-EVANS *97*
A relativistic paradox: H L ARMSTRONG *103*
Nomograms in physics courses? C JAMES *108*
Illustrating atomic movements in solids: E R TURPIN *114*
A quantitative demonstration of the Coriolis effect: I S T TSONG, C A CORNELIUS and D J KAROLY *117*
Demonstrations in colour physics: S J EDWARDS *121*
Editorial, News and comment *65* Letters *67* Book reviews *82* Queries in physics *87* Notes on experiments *104* Film reviews *124* Forthcoming conferences and courses *128*

April 1977

Editorial: R SCHOFIELD *129*
Introduction *131*
Astrophysics and astronomy at Queen Mary College: JOHN BASTIN *135*
Tribology: T F J QUINN *140*
Climatologist of the future: H T MOERTH *143*
After the sixth form: W G MENDS and D PROCTOR *144*
Courses in physics in England, Wales and Northern Ireland *147*
Courses in physics in Scotland *195*
Index *202*

May 1977

Fun with Fraunhofer: T W EATON *213*
Syndicate studies for the systems and management degree: J NEWTON and A H SEVILLE *217*
Motional e.m.f. and animal navigation: A M ROBERTS *221*
Vibrations to waves: WINIFRED SILLITTO *224*
Teaching projectile motion: M K SUMMERS *229*

Phonons, atoms and waves: JOHN S REID *233*
The scattering of gas atoms from solid surfaces: ALAN J WALTON *238*
The forbidden volume of a gas: R J E PORKESS *240*
Misconceptions in school thermodynamics: A H JOHNSTONE, J J MACDONALD and G WEBB *248*
Celestial navigation with the stereographic projection: D R HUTTON *251*
A problem in relative motion: JACOB NEUBERGER *255*
A new naturalistic style of mathematics: C P ORMELL *257*
The use of quartiles in teaching error estimation: L M BROWN *261*
An item bank for multiple-choice questions: C J CHELU and L R B ELTON *263*
Leader, News and comment *205* Letters *208* Physics apparatus *212* Notes on experiments *244* Queries in physics *254* Film reviews *267* Book reviews *267* Forthcoming conferences and courses *268*

July 1977

Amount of substance and the mole: M L MCGLASHAN *276*
Introduction to the mole in the teaching of ideal and real gases: P M WHELAN *279*
The place and importance of the mole in school chemistry courses: R T ALLSOP *285*
Fundamental physical constants and the SI base units: B W PETLEY *289*
A physics field course in the Lake District: C A WATKINS *296*
Stokes' law revisited: E M WRAY *300*
The interface between school and university: R A SUTTON *304*
A misinterpretation of Bernoulli's theorem: DONALD BEDFORD and RAYMOND LINDSAY *311*
Physics and the ear—an outline of the mechanism of hearing: P M HAUGHTON *313*
The variation of viscosity with temperature: P G WRIGHT *323*
The Kelvin–Thomson atom Part 1: The one- to six-electron atoms: ALAN J WALTON *326*
Leader, News and comment *269* Letters *273* Queries in physics *275* Physics apparatus *295* Notes on experiments *318* Film reviews *328* Book reviews *329* Forthcoming conferences and courses *332*

September 1977

Isaac Newton—250th anniversary: P M RATTANSI *339*
A Newtonian miscellany: BRIAN GEE *340*
Gravitation as Newton first saw it: BRIAN GEE *347*
Newton, particles and concepts of force: JOAN L HAWES *351*
Newton's telescope: GEOFFREY CANTOR *354*
Resources for Newtonian studies: BRIAN GEE *356*
Simple gravitation using a programmable pocket calculator: R F PHILLIPS *360*
Teacher-based assessment of practical work in sixth-form physics: M B C DYNAN and R F KEMPA *364*
The Kelvin–Thomson atom Part 2: The many-electron atoms: ALAN J WALTON *370*
Thermoelectric effects and contact potentials: R G CHAMBERS *374*
Experiments on water drop interactions: S G JENNINGS *381*
The use of mnemonics in mathematics and physics: W GOUGH *385*
Numerical solution of the Schrödinger equation for a quantum harmonic oscillator: M K SUMMERS *387*
A 'do-it-yourself' demonstration laboratory: PATRICIA CRYER and J G RIDER *389*
Leader *333* News and comment *334* Letters *337* Queries in physics *338* Film reviews *393* Book reviews *394* Forthcoming conferences and courses *396*

November 1977

A review of chart recorders for use in schools: D T RADFORD *404*
Multifunctional digital instruments: J G ROGERS *411*
D.c. amplifiers and their use in the laboratory: M J TEBBUTT *414*
Some books for practical physics: R D MASTERTON *419*
Programmable calculators for elementary physics teaching: RICHARD BEARE and PETER J NEW *424*
Teaching natural philosophy 175 years ago: JOHN S REID *427*
A role for the academic in library instruction: STEPHEN RAWLINSON *432*
The romance of space: BRIAN DAVIES *438*
Development of physics concepts under zero-gravity conditions: POUL THOMSEN *441*
Astrodynamics: A E ROY *445*
The fundamental interactions of matter: D F FALLA *452*
Leader *397* News and comment *398* Letters *400* Queries in physics *410* Physics apparatus *433* Notes on experiments *434* Book reviews *457* Forthcoming conferences and courses *460*
